Mr. Taylor,

Please accept this correspondence and feel free to use this as you see fit. I am writing this letter to recognize the professionalism and overall attention that is given to each project from your firm. Each project is individually specialized in comparison with another and your firm's understanding and continued support for the best interest of the project (and the owner) is commendable. From the time of bid, the project specifications, design intent, and project drawings are clear. They provide an understood scope of work and define what the owner's intent of the project are.

We have found that your firm understands the difficult and ever-changing roofing industry. With the constant changes of engineering designs, attachments, product approvals, NOA's, and the overall changing product lines; your firm continually seems to comprehend and understand these changes to allow for the best design for each project. To have the ability to determine the best application for each specialized project with a regard for pricing within the project guideline is a unique skill that often goes unnoticed.

I would also like to mention that the time in which questions and/or submittals are returned is not common in our industry. You should be commended for the expedient nature in which these items are dealt with as it also contributes to the timeliness of a well-managed project.

As we stated prior, please feel free to pass this along to any of your potential clients and/or partners. We look forward to working with you in the future and want to thank you for the experience we have had working with you now and in the past. If I can ever be of any service or answer any questions, please let me know.

Sincerely,

Kevin M. Callans

President
