ADG provided design, construction documents and construction administration services.

Project scope consisted of designing a 4,000 square foot kitchen building addition adjacent to the existing cafeteria. Work included misc. renovations to the existing cafeteria and a complete renovation of the existing kitchen spaces into storage rooms and staff dining. The project was designed to be phased with construction of the new kitchen facility completed first then moving the kitchen operations into the new kitchen while maintaining school kitchen and cafeteria school support operations.

Our District has had the pleasure of working with ADG for a number of years. The professionalism shown from all members of ADF have never faltered. Although we are a small District we are always treated as an important customer and any requests or needs have been carried out expeditiously and to our complete satisfaction.

I hope that your partnership with ADG will be as satisfactory as ours has always been. If you require additional information please do not hesitate to call me.

Regards

B.J. Werner
Facilities Specialist
